Jacksonville, NC 28546 • 832-373-8180 • mannyrse@gmail.com • [linkedin.com/in/mannyrse](https://www.linkedin.com/in/mannyrse)

I’m a web developer with a degree in Computer Information Systems (Application Development) and a minor in Web Development. I’m passionate about crafting clean, minimalist websites that emphasize usability and intuitive design. I’m now focused on building real-world projects to sharpen my skills, collaborate with others, and deliver thoughtful, user-centered experiences that genuinely meet clients’ needs.

EXPERIENCE

League of Legends Weekly Skin Sale Site - lolskinsale.com

Aug 2025 · 1 month

Independent Project

- Developed a dynamic web application to display weekly League of Legends skin sales by integrating data from personal Google Sheets API and Riot Games API.
- Implemented real-time fetching and rendering of character and skin data, including splash art images, pricing, and discounts.
- Designed an intuitive, responsive user interface with interactive features like fullscreen image viewing and external spotlight video links to enhance user engagement and experience.

Personal Portfolio Site - mannyrse.com

May 2025 - Present

Independent Project

- Designed and developed a personal portfolio website to showcase my web development work with a clean, minimalist design.
- Focused on creating a responsive, user-friendly design that ensures optimal user experience across various devices.
- Integrated modern design principles and emphasized a user-centered approach, ensuring ease of navigation and a professional aesthetic.

Saxeville Union Cemetery Website - saxevilleunioncemetery.com

Dec 2023 - May 2024

Saxeville Union Cemetery · Capstone Project

- Focused on delivering an interactive burial plot map on the Saxeville Union Cemetery Website.
- Developed a comprehensive project plan, detailing objectives, sprint deliverables, project purpose, goals, timeline, risk management strategies, and resource allocation.
- Utilized WordPress for website development to ensure a user-friendly content management system.
- Created a custom WordPress plugin using PHP that enabled stakeholders to easily update site information without technical assistance.
- Led the design and implementation of the interactive map with QGIS to improve user experience by simplifying plot location.
